

Smart: Electric Assist

Smart 26"

Smart 20"

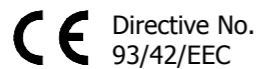

Smart tetra/quad controls

The Smart electric assist bikes provide additional power either on demand or progressively as you cycle. Useful for both paraplegics and tetraplegics.
 Huge range of different additions available from different grips, control layouts, back braking systems and wheel sizes. **There is a Smart cycle that is perfect for you!**
Contact us for more information.

Smart batteries are held low on the chassis, lowering the centre of gravity, increasing stability and traction.

No Brackets, No Fuss. Stricker bikes can fit any chair; just clip on and GO!

Specialist:

Roleez Flotation Wheels

Simply replace existing wheelchair wheels with Roleez flotation tyres using standard quick release system.

Providing access on sand, snow and mud. Use together with hand cycle or ElectrolomoNT for maximum mobility. Contact us for further information

GRV suspension axle

The GRV shows its advantage on slopes. Up to 18% incline are easily tackled. Simply mounted; Attach adapter at the wheelchair

Mount GRV :
Lock with spring pin. ready !
Afterwards:
Pull spring pin and remove GRV.
